NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
ZF FRIEDRICHSHAFEN AG AS OF JUNE 30, 2019

Fundamental Principles

Corporate structure
ZF Friedrichshafen AG (ZF) is a corporation, of which 93.8% is owned by the Zeppelin Foundation and 6.2% by the Dr. Jürgen and Irmgard Ulderup Foundation. The company is headquartered in 88046 Friedrichshafen, Germany, Löwentaler Straße 20.

ZF is a globally leading technology company and supplies mobility systems for passenger cars, commercial vehicles and industrial technology. ZF is set up along the lines of a matrix organization which links the Group-wide competencies of the central functions with the global business responsibility of the divisions and business units. The business units are assigned to the following nine divisions: Car Powertrain Technology, Car Chassis Technology, Commercial Vehicle Technology, Industrial Technology, E-Mobility, Aftermarket, Electronics and ADAS, Passive Safety Systems and Active Safety Systems. Further explanations on the corporate structure can be found in the Group Management Report as of December 31, 2018.

General
The interim consolidated financial statements of ZF Friedrichshafen AG as of June 30, 2019 were prepared as a condensed interim report in accordance with International Accounting Standard IAS 34 “Interim Financial Reporting”, as adopted by the European Union. It includes the following components:

• Consolidated statement of profit or loss from January 1 to June 30, 2019
• Consolidated statement of comprehensive income from January 1 to June 30, 2019
• Consolidated statement of financial position as of June 30, 2019
• Consolidated statement of cash flows from January 1 to June 30, 2019
• Consolidated statement of changes in equity from January 1 to June 30, 2019
• Notes to the condensed interim consolidated financial statements

The condensed interim consolidated financial statements do not include all the pieces of information and disclosures that are required for the consolidated financial statements at the end of a fiscal year and should therefore be read in conjunction with the consolidated financial statements as of December 31, 2018.

The Group’s currency is the euro. Unless otherwise stated, all amounts are reported in millions of euros (€ million).

The interim consolidated financial statements were not subject to any audit or review.

Adoption of IFRS
As a company that is not publicly traded, ZF Friedrichshafen AG has chosen the option to draw up its consolidated financial statements on the basis of IFRS pursuant to Sec. 315e para. 3 HGB (German Commercial Code).

ZF has implemented all standards and interpretations adopted by the International Accounting Standards Board (IASB), London (UK) and by the EU that are mandatory as of January 1, 2019.
### Standard/Interpretation

<table>
<thead>
<tr>
<th>Standard/Interpretation</th>

<td>Jan. 1, 2019</td>
<td>Yes</td>
<td>None</td>
</tr>
</tbody>
</table>

ZF did not apply any new or amended standards and interpretations early whose application is not yet mandatory even though they have been published. Except for the changes in accounting mentioned in the section “Changes in accounting policies”, all other standards applied for the first time in fiscal year 2019 did not result in any effects on ZF Group accounting.

### Basis of consolidation

In addition to ZF Friedrichshafen AG, 32 German and 235 international subsidiaries controlled by ZF Friedrichshafen AG were included in the interim consolidated financial statement.

The following table shows the composition of the consolidated ZF Group (without ZF Friedrichshafen AG):

<table>
<thead>
<tr>
<th>Category</th>
<th>Jan. 1, 2019</th>
<th>First-time consolidations</th>
<th>Legal changes</th>
<th>Deconsolidations</th>
<th>June 30, 2019</th>

<td>0</td>
<td>13</td>
</tr>
</tbody>
</table>

Compared to the previous year, the basis of consolidation increased by eight companies due to acquisitions or new company formations. Two companies were deconsolidated in the fiscal year 2019 as a result of merger.

### Company acquisitions

On March 28, 2019, ZF Friedrichshafen AG signed a binding agreement regarding the acquisition of all outstanding shares of WABCO Holdings Inc. (WABCO) listed on the New York Stock Exchange (NYSE) for a cash purchase price of $136.50 per share. This corresponds to a purchase price of approximately $7 billion. The Board of Management and the Supervisory Board of ZF as well as the Board of Directors of WABCO agreed to the planned acquisition. On June 27, 2019, 68.44% of the WABCO shareholders agreed to the transaction. The transaction is subject to a number of general closing conditions, e.g. approval by the responsible authorities. ZF expects to be able to complete the transaction in the first months of 2020.

WABCO is a leading global supplier of brake control systems, technologies and services for the improvement of the safety, efficiency and connectivity of trucks, buses and trailers. WABCO offers integrated brake control and stability control systems, air suspension, transmission automation and aerodynamics, telematics and fleet management systems. In 2018, WABCO achieved sales of €3.3 billion. The company employs approximately 16,000 people in 40 countries around the globe.
By way of a purchase contract dated March 19, 2019, 60% of the shares of 2 Getthere Holding B.V., Utrecht, Netherlands, as well as its two subsidiaries were acquired. The company based in Utrecht with offices in San Francisco, Dubai and Singapore offers complete automated transport systems. It is working on applications ranging from automated guided electric vehicle systems at airports through to business and theme parks to urban transport infrastructure. With this strategic investment, ZF is implementing its "Next Generation Mobility" strategy and strengthening its foothold in the "Mobility as a Service" and automated guided vehicle systems growth markets. The preliminary purchase price amounts to €19 million and was calculated taking the agreed earn-out regulation into account. At the point of taking over control, €24 million were paid in cash. The goodwill recognized based on the preliminary purchase price allocation amounts to €11 million. The excess remaining after capital consolidation results in particular from the strengthening of ZF activities in the field of autonomous transport systems.

The acquired assets and liabilities of the corporate group have been recognized at the date of acquisition with the following fair values which are based on a preliminary purchase price allocation:

<table>

</tr>
</tbody>
</table>

In connection with the share deal, ZF acquired receivables at a fair value of €7 million. These are exclusively trade receivables. There are no uncollectible receivables. Since the acquisition date, 2 Getthere has contributed sales of €1 million, an amount of €1 million to net profit after tax and €0 million to other comprehensive income. If the acquisition had been effected as of January 1, 2019, the Group’s sales would have amounted to approximately €18,369 million and the Group’s net profit after tax would have amounted to €168 million.

The purchase price allocation has not been completed since there are no final valuations of assets available. Adjustments may in particular result from contingent purchase price elements.

**Consolidation principles and foreign currency translation**

The consolidation methods and the methods for foreign currency translation have not changed compared to the consolidated financial statements as of December 31, 2018.

The exchange rates used for foreign currency translation with a significant influence on the consolidated financial statements changed as follows in relation to one euro:

<table>
<thead>
<tr>

</tbody>
</table>

**Accounting policies**

The condensed interim consolidated financial statements were prepared on the basis of the accounting policies applied for the preparation of the consolidated financial statements as of December 31, 2018, with the following exception:

Income taxes are recognized in the interim consolidated financial statements on the basis of the income tax rate expected for the full year.
Changes in accounting policies

Changes in lease accounting
ZF is applying the new standard IFRS 16 – “Leases” for the first time to the fiscal year beginning on January 1, 2019. The transition to the standard follows the modified retrospective method. Comparative information for leases previously classified as operating leases is therefore not adjusted.

IFRS 16 replaces and changes the previous provisions of IAS 17 in relation to the accounting for leases by lessees. The distinction previously made pursuant to IAS 17 regarding the lessee between recognized obligations from finance leases and unrecognized obligations from operating leases is revoked and replaced by an accounting model for lessees that introduces mandatory recognition similar to the provision for finance lease contracts applicable under IAS 17. The procedure set out in IAS 17 for finance leases is largely followed. Accordingly, as per IFRS 16, a liability in the amount of the present value of the future lease payment and a corresponding asset amount in the form of a right-of-use asset have to be recognized. Accordingly, the depreciation expense for the right-of-use asset has to be presented separately from the interest expenses on the lease liability in profit or loss, with interest expenses being recognized as a component of the net financial result.

IFRS 16 provides accounting options as well as practical expedients that are applied by ZF as follows:

- Lease agreements with a term of up to one year and lease agreements for which the underlying asset is of low value and can be used on a standalone basis are directly recognized in profit or loss, remaining off-balance.

- ZF will not apply IFRS 16 for intangible assets (including software and licenses). These continue to be accounted for in accordance with IAS 38.

Furthermore, the following options and practical expedients were used in the first-time application:

- At the date of the initial application, no re-assessment was made regarding the qualification as a lease of the agreements previously classified as leases under IAS 17.

- Irrespective of their original term, leases that will expire before January 1, 2020 are recognized directly in profit or loss as short-term leases, thus remaining off-balance.

- Apart from very few exceptions, the right-of-use assets from leases are measured at the amount of the lease liability. The latter is the present value of the outstanding lease payments as of January 1, 2019, discounted using the incremental borrowing rate applicable at that date.

- Initial direct costs were not taken into account for the measurement of the right-of-use asset.

- An impairment review of the right-of-use assets was not performed while taking into account potentially existing provisions for onerous contracts.

The initial application of IFRS 16 has mainly led to the following effects:

- For previously existing operating leases, right-of-use assets in the amount of approximately €0.6 billion were recognized as assets in property, plant and equipment and corresponding lease liabilities in the amount of about €0.6 billion were recognized as financial liabilities as of January 1, 2019. These mainly relate to real estate rental contracts and – to a lesser extent – factory and office equipment. The difference resulting from the application of transition options for the initial measurement of the initial right-of-use assets and the lease liabilities as of January 1, 2019, is recognized directly in retained earnings. The application of IFRS 16 resulted in an increase in total assets by 2.2% in the opening statement of financial position for 2019.

- The present value of the lease liabilities was determined using an incremental borrowing rate applicable for the respective lease term and currency. Its weighted average as of January 1, 2019 is 3.4%.

- Options for extension, termination and purchase – if reasonably certain – were taken into account in the measurement of the right-of–use assets, the lease liabilities and the useful life.

- For the subsequent measurement as of June 30, 2019, the capitalized right-of-use assets were depreciated on a straight-line basis over the respective contract period or – if shorter – the respective useful life. The expenses from depreciation are recognized in the corresponding functional areas. The interest portion contained in the lease payments is recognized in the net financial result. Compared to the previous treatment of costs from operating leases in the operating profit only, this results in a correspondingly slight improvement in the EBIT.
• In the consolidated statement of cash flows, this change in recognition in the statement of profit or loss has a positive impact on the cash flow from operating activities. The cash flow from financing activities is reduced by the repayment amount of the lease liabilities and the interest portion contained in the lease payments.

• Pursuant to IAS 17, non-exercised renewal options only had to be taken into account in the measurement of the financial liability from finance leases in specific cases. To the extent that the prerequisites are met, these are taken into account in the carrying value under IFRS 16, leading to an increase in total assets.

• To a minor extent, temporary differences led to the recognition of deferred taxes.

The difference between the nominal value of the expected cash payments for rental and lease agreements reported as of December 31, 2018, and the present values of the lease liabilities recognized upon transition as of January 1, 2019, is mainly due to discounting effects as well as – in line with the requirements of IFRS 16 – to the consideration of extension options that are reasonably certain to be exercised in the lease liabilities. Moreover, in line with the practical expedients no liabilities for short-term leases and leases for underlying assets of low value were recognized upon transition.

### Notes to the Consolidated Statement of Profit or Loss

The consolidated statement of profit or loss has been drawn up in accordance with the cost of sales method.

#### 1 Sales

### Notes to the Consolidated Statement of Financial Position

#### Current trade receivables

Compared to the end of fiscal year 2018, trade receivables have increased seasonally.

#### Intangible assets

The decrease in this line item mainly results from the continuously high level of amortization and impairment of intangible assets that exceeded investments in the first half of 2019.

#### Property, plant and equipment

The increase in property, plant and equipment is mainly the result of the capitalization of right-of-use assets in connection with the first-time application of IFRS 16 in the fiscal year 2019.

#### Impairment tests

As of June 30, 2019, there were no indications for required impairment in the cash-generating units of ZF. Both in the first half of 2019 and the comparative period, neither impairments nor reversals of impairments were recognized.

#### Financial liabilities

The increase in current financial liabilities mainly results from the utilization of bilateral lines to finance ongoing business activities and the reclassification of a bond tranche due in January 2020 in the amount of €507 million from non-current to current financial liabilities. This is supplemented by an increase due to the classification as liabilities of lease liabilities in the context of the first-time application of IFRS 16 (“Leases”) as of January 1, 2019.

Compared to December 31, 2018, the non-current financial liabilities increased slightly. On the one hand, they decreased due to the above-mentioned reclassification of a bond tranche. However, this effect was overcompensated for by the classification as liabilities of lease liabilities due to the first-time application of IFRS 16.
In the context of the acquisition of WABCO, a new syndicated financing of €7.3 billion was agreed with a total of 15 banks. The financing was completely unutilized as of June 30, 2019. The credit commitment contains a bridge financing in the amount of €4.8 billion with a term of maximally two years as of the point of utilization. The bridge financing should be released in the short or medium term by the capital market.

**Current trade payables**

Compared to the end of fiscal year 2018, trade payables have decreased for business reasons.

**Provisions for pensions**

The increase in this line item results from the lower discount rates for the evaluation of pension provisions. The effects of applying the changed discount rates are recorded in other comprehensive income as actuarial losses.

The following discount rates were applied as of June 30, 2019:

<table>
<thead>
<tr>
<th></th>
<th>June 30, 2019</th>
<th>Dec. 31, 2018</th>
</tr>
</thead>
<tbody>

Notes to the Consolidated Statement of Cash Flows

General

The consolidated statement of cash flows shows how the cash position of the consolidated ZF Group changed during the fiscal year due to the inflow and outflow of funds. A distinction is drawn between cash flows from operating, investing and financing activities.

The cash position presented in the consolidated statement of cash flows covers all cash reported in the consolidated statement of financial position, i.e. cash on hand and cash at banks, available at any time for use by the consolidated ZF Group.

The cash flows from investing and financing activities are determined on the basis of payments. The cash flow from operating activities, on the other hand, is indirectly derived from the net profit or loss before income tax.

Dividends and interest received are assigned to the cash flow from investing activities. Interest and transaction costs paid for borrowings are included in cash flow from financing activities. To this end, the net profit or loss before income tax in the cash flow from operating activities is adjusted by the financial result and the net result from participations.

As part of the indirect calculation, the changes in financial line items taken into account in conjunction with the operating activities are adjusted for effects from the translation of foreign currencies and changes in the basis of consolidation. Changes in the respective financial line items can therefore not be reconciled to the corresponding values on the basis of the published consolidated statement of financial position.

Company Acquisition

The assets and liabilities of consolidated companies received on the date of acquisition are composed as follows:

<table>
<thead>
<tr>
<th></th>
<th>2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current assets</td>
<td>8</td>
</tr>
<tr>
<td>Non-current assets</td>
<td>21</td>
</tr>
<tr>
<td>Current liabilities</td>
<td>9</td>
</tr>
<tr>
<td>Non-current liabilities</td>
<td>7</td>
</tr>
</tbody>
</table>

The preliminary purchase price taking the agreed earn-out regulation into account amounts to €19 million; €24 million in cash were paid.

Other Disclosures

Litigation

In connection with recalls of airbags by Hyundai, KIA and FCA, ZF submitted a notification to the National Highway Traffic Safety Administration (NHTSA) in the USA and is in regular contact with this authority. At the same time, ZF is of the opinion that it is not responsible for any grounds of the recalls and will defend itself against potential claims.

In 2014, the Brazilian antitrust authority, Conselho Administrative de Defesa Economica (CADE), searched the premises of one of our Brazilian subsidiaries to investigate the suspected violation of antitrust provisions in connection with the sale of specific vehicle components. ZF is cooperating in this procedure.

In addition, various German ZF locations were searched by the German Federal Cartel Office, Bundeskartellamt, in 2016 in the context of an investigation in relation to agreements regarding steel purchasing that violate antitrust law. ZF again is cooperating with the investigating authorities in this procedure. The duration and outcome of the procedure are uncertain.

In a pending class action lawsuit in the USA against several companies from the automotive industry, plaintiffs have stated that ZF participated in the alleged development and implementation of illegal equipment for the manipulation of vehicle emission tests. Although ZF is not mentioned as a defendant in the complaint in connection with the pending procedure, the role of ZF in this is currently being investigated in the procedure. Furthermore, ZF is currently in contact with the public prosecutor’s office in Stuttgart with regard to emission and consumption topics. In this matter, ZF is cooperating with the public prosecutor’s office. So far, no formal investigation has been launched against individuals or the company.

Neither ZF nor any of its Group companies are involved in current or foreseeable court or arbitration proceedings which, based on facts known today, have had in the past or could have a significant impact on the economic situation of the consolidated ZF Group.
Financial instruments

Carrying amounts of the financial instruments by categories
The following table shows the recognized financial assets and liabilities by measurement categories:

In the following, the financial instruments recognized at fair value are allocated to the three levels of the fair value hierarchy based on the input parameters used for measurement. The classification as well as the need to perform reclassifications are reviewed on the reporting date. Level 1 covers those financial instruments for which prices for identical assets and liabilities quoted on active markets are available. Allocation to level 2 occurs if input parameters that are directly (e.g. prices) or indirectly (e.g. derived from prices) observable on the market are used for the measurement of the financial instruments. Financial instruments whose valuation is based on information that is not observable on the market are reported in level 3.

Investments in participations which are traded on an active market are recognized at share prices of the stock exchange of the respective country. Derivative financial instruments included in level 1 refer to tradable derivatives such as futures. Their fair value corresponds to the value traded on the derivatives exchange.
With level 2 investments in participations measured at fair value, measurement is based on transactions that can be observed in the market. Furthermore, a part of the trade receivables, whose measurement can be derived from parameters observable in the market, has been assigned to this category. The level 2 derivative financial instruments concern non-tradable derivatives. Fair values are determined on the basis of fixed prices quoted on approved stock exchanges discounted for the remaining term (foreign currency exchange rates, interest rates and raw material price indexes).

The level 3 investments in participations concern investments in companies that are not listed on the stock exchange. In the case of these investments in participations recognized at fair value through profit or loss, there is either not enough information available or only a vast range of possible values can be determined for the fair value by using a multiplier method. The acquisition costs are therefore used to appropriately estimate the fair value. In case of changes in the environment of the participations or in case of proof due to external transactions, the estimate is adjusted accordingly.

A significant change regarding the future results and multipliers used for the multiplier method would affect the fair value of these investments in participations in the amount of –€15 million to +€2 million.

The measurement of level 3 financial receivables is based on information not observable on the market and for which there are no comparable transactions with market values to be derived from such transactions.

With respect to hedging a material portion of the purchase price of the WABCO transaction (underlying transaction) in the amount of approximately $7 billion against currency fluctuations, ZF concluded a transaction-related forward contract. As the forward contract is bound to the execution of the underlying transaction, this contract was classified as level 3. The fair value of this forward contract is determined based on the two components of a premium paid only in case of execution of the underlying transaction and the market value of the forward contract. The value of the premium was ascertained on the basis of the futures price observable on the market at the time of conclusion and the tender price agreed on with the contracting party at the time of maturity of the underlying transaction. The market value of the forward contract was determined in line with market standards from parameters observable on the market.

The following table illustrates the development of financial instruments assigned to level 3 of the fair value hierarchy:

<table>
<thead>
<tr>
<th>Investments in participations in € million</th>
<th>2019</th>
<th>2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>As of Jan. 1</td>
<td>46</td>
<td>58</td>
</tr>
<tr>
<td>Fair value changes recognized through profit or loss</td>
<td>0</td>
<td>77</td>
</tr>
<tr>
<td>Purchases</td>
<td>8</td>
<td>11</td>
</tr>
<tr>
<td>Sales</td>
<td>0</td>
<td>–2</td>
</tr>
<tr>
<td>Reclassifications from level 3 to level 2</td>
<td>0</td>
<td>–98</td>
</tr>
<tr>
<td>As of June 30/Dec. 31</td>
<td>54</td>
<td>46</td>
</tr>
</tbody>
</table>

The profits recognized through profit or loss in the previous year are contained in other net results from participations.

<table>
