

ZF Bus Connect

New Service Offerings Health Check for ZF Systems

Condition monitoring and predictive maintenance

Avoid unplanned, costly downtime

Issues causing a breakdown:

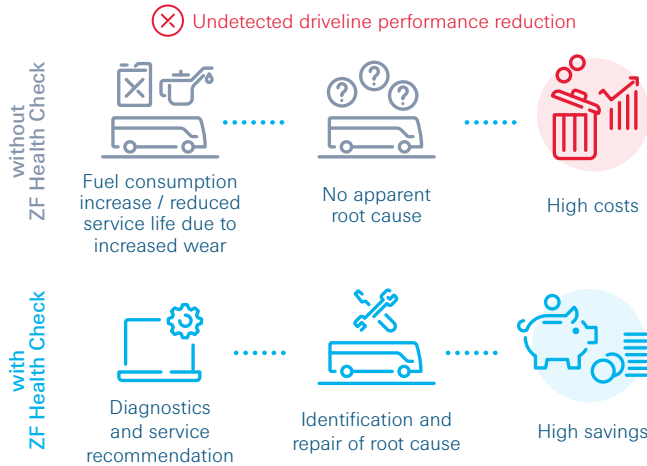

save up to €12000 per incident

with Health Check.

Savings depend on external costs like towing, time-to-repair, costs of parts...

Continuous Performance Monitoring

Improve driveline performance and fuel economy

⊗ Undetected driveline performance reduction

Driveline performance:

save up to €100 vehicle / month

(3% Fuel Consumption decrease)

with Health Check.

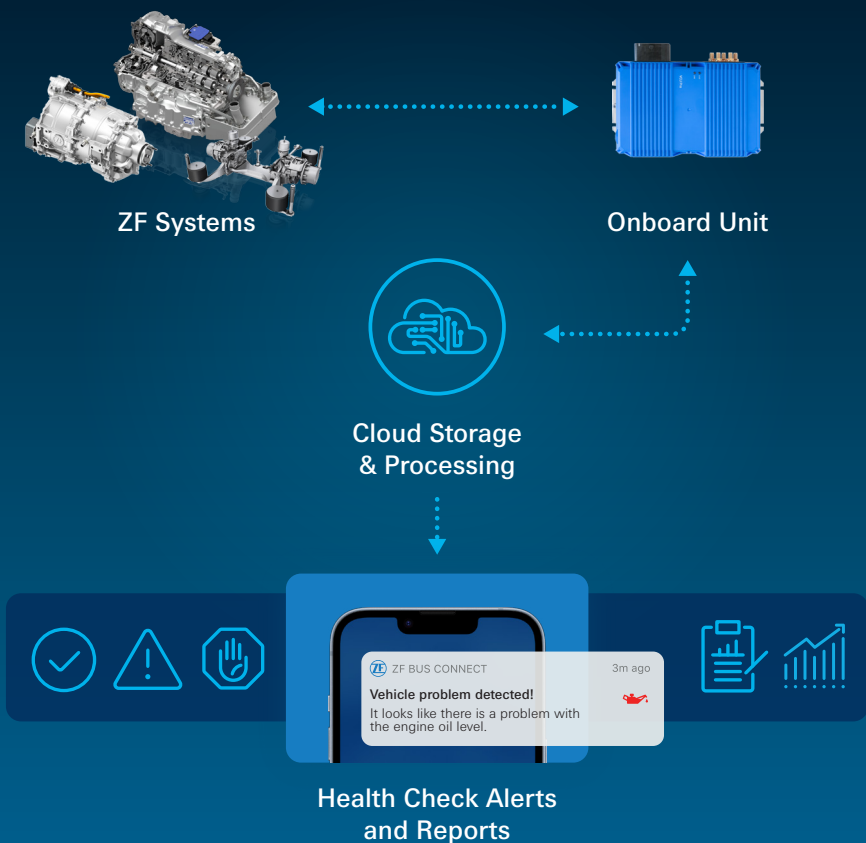

Savings depend on driveline configuration, previous optimizations...

⚠ ZF Bus Connect driveline performance alert

Remote Support

Find the resolution to your problem in the quickest way, with the right specialist

Services

Reactive

Offline

- Cost and time inefficiency
- Unpredictability of reactive service demands
- No remote data access
- Only on-site applicability of diagnostics too
- Poor forecast of spare parts demand and availability

Proactive

Connected

- Predictable planning of service and spare parts
- Condition monitoring and predictive maintenance
- Prompt remote diagnosis and supply of spare parts
- Uptime increase
- Cost and time saving
