Technical Bulletin

Brake Fluid Replacement Requirement

Fluid Requirement

This bulletin supplements the information contained in WABCO Maintenance Manual, MM-0401: WABCO Hydraulic Power Brake (HPB) system for the regular maintenance of the WABCO HPB System. For the proper functioning of the system, seals and components, WABCO recommends replacing brake fluid every TWO (2) years on all vehicles equipped with WABCO HPB system. This is done to minimize exposure to contaminated brake fluid. To replace the brake fluid, please follow the instructions indicated under the title "Changing Hydraulic Brake Fluid" under Section 5 of MM-0401.

NOTE: Please keep this document with MM-0401 for vehicle users to refer to this document for regular maintenance.

NOTE: While changing the brake fluid according to instructions under Section 5 of MM-0401, please read and observe all Warning and Caution hazard alert messages published onwards from Page 99 of MM-0401 under Section 5, apart from those published below.

WARNING

Never reuse hydraulic brake fluid that has been removed from a vehicle. Hydraulic brake fluid that has been removed can be contaminated and can cause damage, loss of braking and serious personal injury. Always discard hydraulic brake fluid in accordance with applicable environmental requirements.

Use DOT 3 or DOT 4 hydraulic brake fluid. Refer to the vehicle specification sheet to determine which fluid to use. Do not use or mix different types of hydraulic brake fluid. The incorrect hydraulic brake fluid will damage the rubber parts of the brake caliper and can cause damage, loss of braking and serious personal injury.
