

deTAGtive logistics Portal Datasheet

The web application lets you manage TAGs and TAG Finders from a computer at your desk and access all TAG data collected in the cloud. The data can also be exchanged via an interface into software systems that you use.

Reliable proof in case of
warranty claims
Reduction of paperwork
and workload for
your employees

- Discover potential for optimizing your internal and external logistics processes
- Live notifications for events allowing for immediate action

OPENMATICS
