

ZF Bus Connect

Uptime Improvement with Vehicle Health

zfbusconnect.com

ZF Bus Connect brings unique vehicle health evaluation, combining different source of data such as DM1, ZF Health Check, TPMS, Brakes, and many others. This provides fleet operators, bus manufacturers and workshops comprehensive information about health condition of the vehicles.

Main USPs:

- uptime improvement
- clear and fast overview of fleet condition
- ease of mind with maintenance planning
- easy to integrate to 3rd party systems
