

Versatile and lightweight

Intelligent compact tilt lock solution for 3- and 4-wheeled motorcycles

Tilt Lock

The motorcycle tilt lock is a versatile and lightweight solution for use as a tilt locking device for 3- and 4-wheeled motorcycles.

It uses a commercially available electrical connector and an integrated electrical actuator to apply or release the tilting mechanism at the press of a switch. This enables fast and easy locking and unlocking of tilting, for 3- or 4-wheeled vehicles, providing a highly desirable user experience.

Advantages

- Lightweight and compact. Dimensions: 124.6mm x 163.4mm x 117mm (WxDxH), weight 1817g
- Intelligent and safe electronic control
- Automatic apply and release functionality is possible
- Connects to the vehicle CAN bus
- Lamp driver outputs included
- Easy installation

Optional features

- Configurable logic
- Additional features available
- Wheel speed inputs available
