

Get back on the Road again

ZF Tradition – Reconditioning, repair and reproduction of historic automotive components and classic spare parts

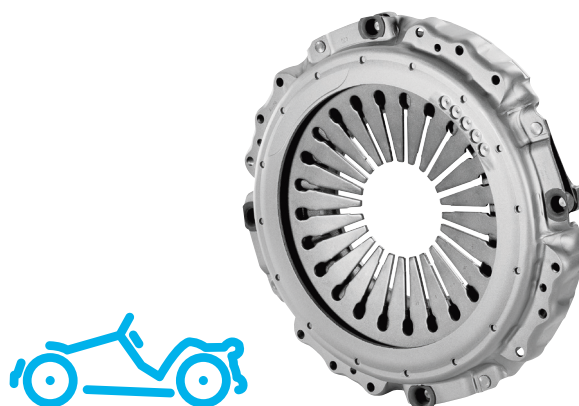

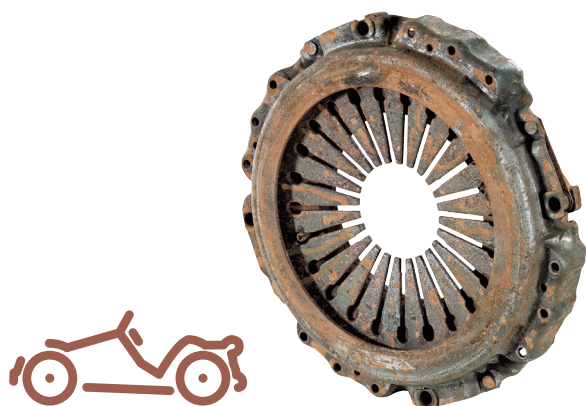

tradition

Your specialist for historic spare parts

125 years of automotive competence and experience at your service. ZF Tradition offers a range of products and services for historic vehicles.

As was once the case with the development of your vehicle, today ZF still supports the preservation of your vehicle's mobility for the future.

Problems with historic products?

You own a classic car or another historic vehicle and need spare parts or an overhaul of components.

We have the best solution!

ZF Tradition offers you the right solution for a wide range of products. From service or overhaul, reconditioning and repair to the reproduction of vehicle components.

ZF Tradition and ZF Race Engineering

As a global technology company, ZF is not only active for global automotive customers with high-volume production, but also includes business units that focus on the development and manufacture of niche products.

ZF Race Engineering bundles ZF's business in motorsport applications, low-volume applications, engineering, consulting and testing, all acting as a one-stop supplier of ZF products for specific requirements in the market. ZF Tradition is one of the four business areas of ZF Race Engineering.

motorsport

- Products and innovations for winners
- High-end solutions at the technical limit
- First class service and on-site support
- Long service life
- Competence for 125 years

motorbike

- Smart technologies in driving dynamics, integrated safety and e-mobility
- Motorsport & special series applications
- Next generation mobility

special series

- Premium small series solutions
- Agile & experienced engineering partner
- Advanced test facilities
- IAM performance tuning parts

tradition

- Classic car specialist
- Repair and restoration
- OE certified service
- Traditional manufacturing methods

ZF Tradition gets you back on the road

Do you have any questions about vehicle parts or our services?

Please feel free to contact us.

Whatever is necessary - we offer you the right solution

Reconditioning

We work with specialized staff, high-precision tools and test benches to carry out reconditioning or repairs for all our historic products.

Remanufacturing

Thanks to our extensive drawing archive, we are able to reproduce any of our spare parts according to the original parts list, original drawings and the ZF quality of the time.

Repairs

Based on recalculations and the use of the latest manufacturing technologies, we produce high-quality original spare parts and products for you.

Original spare parts for classic cars

ZF Tradition has original spare parts for all historical ZF products ready for you. Should a spare part not be in stock, we can always offer you a one-off production for your required spare part.

Vehicle components and services

Vehicle classes and components

Passenger cars and sports cars
