

ZF in Industrial and Rough Terrain Cranes

Rough terrain cranes are specialized mobile cranes for construction sites in rough terrain, which, thanks to all-wheel drive, high ground clearance and compact design, can lift and move heavy loads precisely.

The ZF ERGOPOWER powershift transmission is the perfect match for this application. The robust gearbox design with excellent automatic shifting comfort offers top performance in demanding working environments. The shuttle shifts are very smooth and therefore ideal for high maneuvering requirements. With the torque converter lock-up clutch and the axle disconnect for 2WD it offers high efficiency during transfer journeys.

ERGOPOWER

- Powershift transmission with torque-converter and optional lock-up clutch for direct drive
- 6 gear forward and 3 reverse
- Axle disconnection and longitudinal differential available
- 2 PTO available

Product and performance classes

Lift capacity	Transmission	Engine Power
Class up to 15 t Class up to 33,100 lbs	WG 94	90 kW
Class up to 20 t Class up to 44,100, lbs	WG 115	105 kW
Class up to 30 t Class up to 66,200 lbs	WG 160	130 kW
Class up to 60 t Class up to 132,400 lbs	WG 190	160 kW
Class up to 100 t Class up to 220,500 lbs	WG 210	190 kW
Class up to 150 t Class up to 330,700 lbs	WG 260	260 kW
