ZF Rescue Connect

Digital Solutions for Emergency Services

ZF Rescue Connect networks and digitizes all emergency and rescue services in Europe with the latest connectivity solutions. This product connects data from all the rescue services like fire departments, ambulance or other emergency organizations to support emergency management and decision-makers not only in dealing with everyday tasks, but also in the event of large-scale and mass-casualty incidents.

For the first time, vehicles, equipment and people are all connected centrally

Our products are specially designed for manufacturers of emergency vehicles, suppliers of rescue equipment and providers of operation-specific software. In addition, we offer manufacturer-independent solutions for organizations with security tasks as well as for regional and national authorities.

Our customer groups

Fleet & Service Operator

Our software solutions for fleet & service Operators bring benefits to providers of emergency services and end-users. Whether you are a technician of a fleet or an incident commander in the field, we offer our customized solutions to perform your tasks efficiently.

Third Party Users

We solve individual needs of our third party customers in the field of emergency call centers and command structures of governmental or non-governmental authorities with tailored solutions and interfaces.

OEM & Manufacturer

Unique software solutions for OEM & Manufacturer of emergency vehicles and rescue equipment. ZF Rescue Connect enables, especially smaller and mid-size companies, to develop their own digital footprints and maximize commercial benefits of technologies.
