

APL90

All-Wheel Drive Axle System

Designed for toughest off-road environments

Flexibility

Supports special axle arrangements and 8x8 applications. Available as first axle and drive-through variant for the second front axle

Robust Design

Proven technology for demanding off-road environments with high ground clearance to prevent ground contact damages

Advanced Features

Holistic system with advanced features, including integrated Central Tire Inflation System for improved traction and reduced tire wear as well as specific drum brakes

Servicefriendly

Comes as a service-friendly solution thanks to compact and self-contained wheel bearings and long lubrication intervals
