

ZF in Mixer

ZF has been a trusted market leader in mixer drives for over 45 years, delivering proven performance and reliability for concrete applications worldwide.

The P-Series meets the requirements of all mixer truck classes from 7 m³ to 12 m³, combining decades of experience with cutting-edge engineering.

ZF mixer transmissions are synonymous with quality, durability, and robustness, making them the preferred choice for every concrete class.

ECOMIX – P-Series

The technology and design of the P-Series set the benchmark in the mixer industry.

- Variants for all drum sizes available
- Decades of proven reliability in series production
- Exceptionally robust design and “bulletproof” quality
- Superior performance under demanding conditions
- Easy integration and application

ZF Driveline Technology for Mixer

Product and performance classes

Mixing capacity	Transmission	Total ratio	Output torque max. / nom.	Installation angle max.	PTO
Class up to 8 m ³ Class up to 10.5 yd ³	P-3301	141.0	54.000 Nm 48.000 Nm	15°	none
Class up to 10 m ³ Class up to 13.1 yd ³	P-5300	135.3	70.000 Nm 60.000 Nm	13.5°	Yes
Class up to 12 m ³ Class up to 15.7 yd ³	P-7300	144.3	80.000 Nm 72.000 Nm	13.5°	Yes
Class up to 12 m ³ Class up to 15.7 yd ³	PK-7500	138.6	80.000 Nm 72.000 Nm	13,5 °	None
